

Fluticort Plus

Fluticasone Propionate 125 /250 mcg /dose
+ Salmeterol 25 mcg

HFA Inhaler

Long Lasting Control for
Better Breathing

More efficient improvement in asthma control compared with brand¹

Significant improvements in lung function and QoL from day^{1,2}

Effective and quick asthma control with low dose ICS in combination vs high dose ICS alone ²

More patient compliance of containing both ICS and LABA in one inhaler ³

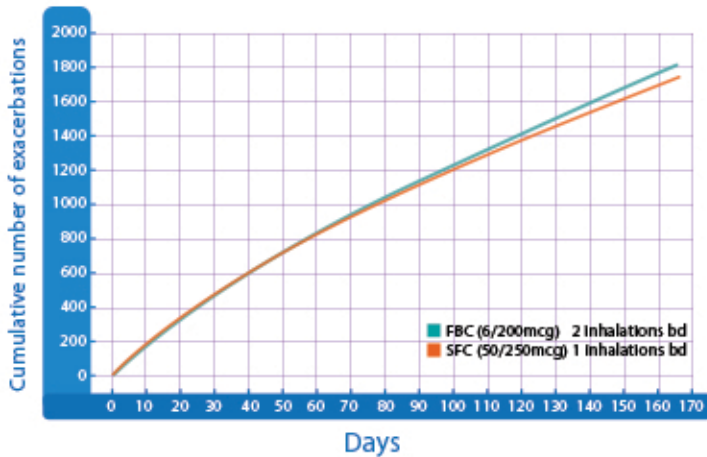

High quality, consistent availability and affordable price manufactured by **Medi Spray** international Co.

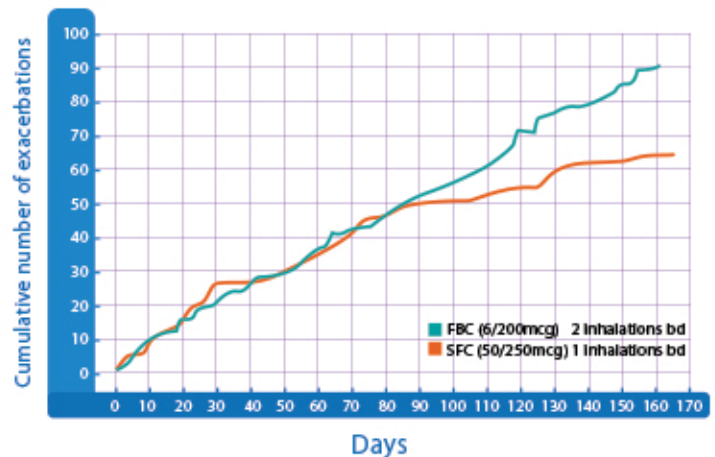

Efficacy comparison of Salmeterol/Fluticasone vs Formoterol/Budesonide in adults with persistent asthma³

EXCEL Study

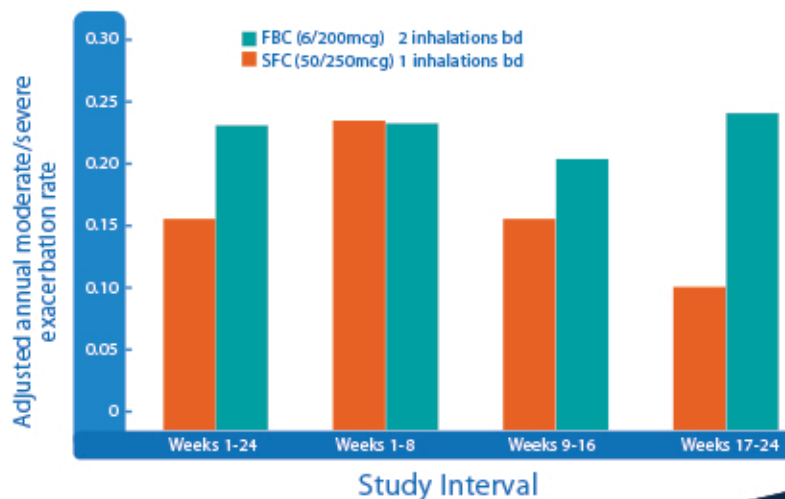

The cumulative number of all exacerbations, was slightly higher in FBC vs SFC and this difference increased as time progressed

The cumulative number of moderate/severe exacerbations, was significantly higher in FBC vs SFC and this difference increased as time progressed

The significant reduction in the rate of moderate to severe exacerbations in SFC vs FBC specially in the last 8 weeks of treatment

Salmeterol / Fluticasone was found to be significantly superior to Budesonide / Formoterol in reducing the rate of moderate to severe exacerbations specially over time with regular stable dose treatment, as mentioned in GINA 2020.^{3,4}
